■ Description

OPTICIS active optical HDMI 2.0 cable, LHM2-N is designed for critical display applications that demand flawless HDMI signal integrity and it provides transparent signal transmission over plenum graded, LSZH graded, or TPU hybrid cable.

It enables to deliver 4K DCI(4096x2160) at 60Hz signal up to 100m(328feet). It avoids any scaling or data compression for lessening a burden of data transmission.

LHM2-N series give slim, light, easy installation like a general copper HDMI cable. It holds firmly distinctive performance advantage as it requires absolutely no external power to operate. It solely utilizes TX and RX of the cable to function without any additional setting requirements.

It passes CEC, EDID & HDCP (High Definition Contents Protection) for better installation flexibility and compatibility.

■ Absolute Maximum Ratings

Stresses in excess of the absolute maximum ratings can cause permanent damage to the device. These are absolute stress ratings only. Functional operation of the device is not implied at these or any other conditions in excess of those given in the operational sections of the datasheet. Exposure to absolute maximum ratings for extended periods can adversely affect device reliability.

Parameter	Symbol	Min	Typ	Max	Units
Storage Temperature ¹	T _{ST}	-30		70	°C
Supply Voltage ¹	V _{CC}	-0.5		6	V
Operating Humidity ²	RH	5		85	%
Electrostatic Discharge	ESD	-8		+8	KV

■ Recommended Operating Conditions
